NATURE 388:539-547(1997).

-i- FUNCTION: CELL WALL FORMATION (BY SIMILARITY).

-i- CATALYTIC ACTIVITY: ATP + UDP-N-ACETYLMURAMOYL + L-ALA
ADP + ORTHOPHOSPHATE + UDP-N-ACETYLMURAMOYL-L-ALANINE.

-i- PATHWAY: PEPTIOGLYCAN BIOSYNTHESIS.

-i- SUBCELLULAR LOCATION: CYTOPLASMIC (PROBABLE).
                                                                                                                                                                                 1004

CATALYTIC ACTIVITY: ATP + UDP-N-ACETYLMURAMOYL + L-ALANINE ADP + ORTHOPHOSPHATE + UDP-N-ACETYLMURAMOYL-L-ALANINE.

PATHWAY: PEPTIDOGLYCAN BIOSYNTHESIS.

SUBCELLULAR LOCATION: CYTOPLASMIC (PROBABLE).

SIMILARITY: BELONGS TO THE MURCDEF FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  0-2.4 min

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   SCIENCE 269:496-512(1995).

-i- FUNCTION: CELL WALL FORMATION (BY SIMILARITY).

-i- CATALYTIC ACTIVITY: AFP + UDP-N-ACETYLMURAMOYL + L-ALA-ADP + ORTHOPHOSPHATE + UDP-N-ACETYLMURAMOYL-L-ALANINE.

-i- PATHWAY: PEPTIDOGLYCAN BIOSYNTHESIS.

-i- SUBCELLULAR LOCATION: CYTOPLASMIC (PROBABLE).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               SCOTT J.D., SHIRLEY R., LIU L.-I., GLODEK A., KELLEY J.M., WEIDMAN J.F., PHILLIS C.A., SPRIGGS T., HEDBLOM E., COTTON M.
